What I claim is:

1. (Original) An automated merchandising system for computer software comprising:
  - a memory for storing software for distribution to customers;
  - a point of sale terminal including customer interface means for receiving a software select customer choice input;
  - means for writing the software selected by the customer from the memory onto a software carrier; and
  - means for associating an identification code with the selected software provided to the customer,
  - said identification code comprising at least one of the following identification parameters: purchaser identification, point of sale identification and date of purchase,
  - wherein said means for associating comprises means for embedding said identification code on the software carrier.
2. (Once Amended) An automated merchandising system for computer software according to claim 1 and also comprising means, associated with said customer interface means, for verifying means of payment.
3. (Original) An automated merchandising system for computer software according to claim 1 and also comprising means for printing manuals accompanying the software selected by the customer and dispensing same to the customer.
4. (Original) An automated merchandising system for computer software according to claim 1 and also comprising means for preventing copying of software copied onto the software carrier.
5. (Original) An automated merchandising system for computer software according to claim 1 and wherein said memory is located at a point of sale terminal.

6. (Twice Amended) An automated merchandising system for computer software according to claim 1 and wherein said memory is located at a location remote from a point of sale terminal and is connected therewith [terminals] by [means of ]a modem.

7. (Original) An automated merchandising system for computer software according to claim 1 and comprising a plurality of point of sale terminals in communication with said memory.

8. (Original) An automated merchandising system for computer software according to claim 1 and wherein said memory also contains information used to print manuals.

9. (Twice Amended) An automated merchandising system for computer software according to claim 1 and wherein said point of sale terminal includes [means permitting] a modem for remote access by [a] the customer [via a modem].

10. (Twice Amended, now as original) An automated merchandising system according to claim 1 and also comprising means for dispensing said carrier bearing the software selected by the customer to the customer.

11. Canceled.

12. (Original) An automated merchandising system according to claim 1 and also comprising means for generating a sales report in hard copy form including at least one of the following identification parameters: purchaser identification, point of sale identification, program identification, date of purchase, serial number for program copy.

13. (Original) An automated merchandising system according to claim 1 and also comprising means for generating and displaying a menu for enabling a potential customer to locate software in which

he has a potential interest.

14. Canceled.

15. (Once Amended) An automated merchandising system according to claim 1 and also comprising:

demonstration computer means for [providing to a potential customer the opportunity for] operating the software by a potential customer prior to a decision to purchase.

16. (Once Amended) An automated merchandising system according to claim 1 and also comprising:

means for generating a sales report in hard copy form including at least one of the following identification parameters: purchaser identification, point of sale identification, program identification, date of purchase, serial number for program copy; and

means for generating and displaying a menu for enabling a potential customer to locate software in which he has a potential interest[, and wherein said means for associating comprises means for imbedding said identification code on the software carrier].

17, 18. Canceled.

Claims 19-77 are cancelled.

STATUS OF CLAIMS AND SUPPORT FOR CLAIM CHANGES

(37 C.F.R. §1.173(c))

1. The status of the claims as a result of the amendment submitted herewith is:

Claims 1-10, 12, 13, 15 and 16 are pending.

2. The support in the disclosure of the patent for the changes made to the claims:

The amendment made to claim 6 has been made to avoid a potential ambiguity, and not for patentability.
